

Linking GNSS, CORS and Reference Frames

Mikael LILJE (Sweden)

Key words: ITRF, WGS84, GNSS, GPS, reference systems

SUMMARY

There is an increasing demand for using harmonised reference systems regionally and globally. The solution has been to use ITRF-based realiations also nationally. The papers and presentations gives an idea on how the WGS84 is linked to ITRF as well as how to link your CORS to ITRF.

CONTACTS

Vice Chair and Chair of WG 5.2 - Reference Frame in Practice

Mikael Lilje

Head of Reference Frame Section

Geodetic Research Division

Lantmäteriet

SE-801 82 Gävle
