

New IT Tools Enhance the Surveyors Role in France

Mr. Armel BERTIN, Mr. Patrick BEZARD-FALGAS and Mr. Rafic KHOURI, France

Key words: Cadastre, Land management, Cappadocia, Registration, Problems of registration

SUMMARY

French surveyors are entrusted with a public mission: identify property boundaries; thanks to the RTK network they are implementing and the establishment of a property data base with legal identification of the boundaries, they are strongly enhancing their role in France's land administration.
