

Land use Plan in Project "Bar-Boljare Highway" - the first Highway in Montenegro

Mladen Femic (Montenegro)

Key words: Digital cadastre; GSDI; Land distribution; Land management; Land readjustment; Risk management; Spatial planning; Valuation

SUMMARY

In my work I want to describe the question of Land Use plan in the beginning of the project of building the first highway in my country (Montenegro - former Yugoslavia).

I want to present how I collected all the information about land around the corridor of the highway and how the related teams made decision according to my presented data.

In the beginning of the project (our government signed design and build contract with chinese Contractor CRBC) we made a lot spatial decision according to the specific locations needed for the project - dumping areas, Contractor facilities, access roads, lines for power supply etc.

I want to show how we, as an employee suggested to the Contractor which land to use and how to use.

Land use Plan in Project "Bar-Boljare Highway" - the first Highway in Montenegro
