The role of old historical knowledge in a modern Cadastre
20210622 02.2, 10:30 hr

ORGANISED BY

PLATINUM SPONSORS

Old wine in new bags

- Agenda
 - Introduction
 - Of myself
 - Of my paper
 - Of my presentation
 - Conclusion
 - End

Myself

- 65 years young
- Started in 1974 at the Cadastre in the Netherlands
- Worked in several roles
- Started working analogue and involved with the conversion to digital

My paper

- Describes the workingproces of digitizing the analogue map
 - Digitizing a map
 - Connect the several files to one file of the whole Netherlands
 - Transform the digitized files to the national grid of the Netherlands
- Conclusion

My presentation

- Why is old knowledge worthfull?
- Is there a role of COVID-19?
- What is the future in the new normal world?

What was my most innovative aspect of my case study?

- Knowing the cadastral process
- Knowing what and why we are doing this
- Knowing the quality of the data

How did this respond to the COVID-19 restrictions?

- Difficult is
 - Networking
 - No coffee machine
- Easy is
 - No traveling for meetings
 - Better planning working time and “own” time

What lessons did you get for future blended/hybrid approaches learning and teaching?

- Cherish old knowledge to transfer
- Accompany new/young people in my organization
- We got another world after Covid-19
- Home will be the workplace, special for office workers
 - Of course surveyors has to go the field

Lessons

- We have to implement the role of buddy/ personal teacher
 - For transferring knowlegde to the next generation
 - For advicing in the organization or outside
- I work till my last working day. But would it be better that I stopped working earlier and was my last two or three years only a buddy?

Questions or discussion
